2. Citations and explanations (Rule 70.7)

The present invention relates to the use of compounds of formula (I), containing ethephone, for the treatment of stone fruit, in particular for improving flower formation.

Document D1 describes the use of ethephone (without (I)) on, *inter alia*, stone fruit. Flower formation is one of the parameters influenced (positively). However, no example is provided wherein the flower formation of specifically stone fruit is examined. In some cases (for instance examples 22 and 36) the use of ethephone is detrimental to flower formation.

Consequently, no teaching concerning the claimed combined use of chemicals is available, nor can these measures be derived from the prior art.
